

I have owned an XM Satellite Radio for over 2 years now. It has become an integral part of my life, as I have about 3 hours of commuting to and from work each day. Their latest addition, of the local Traffic and Weather station has been nothing short of sensational! The way I see it, if they can provide me with all the necessary information that will help me get to and from work...and also keep me entertained along the way, I'm all for it!!!!!! Not to mention the fact that I AM paying for it...and I don't see why someone else should decide what I can listen to!!!!...it's my money!! I respectfully request that the NAB's petition 04-160 be rejected, so that I may continue to benefit from the wide variety of national and local programming that my XM Radio provides me.
